Cutting technology

- **CALEMARD** has gained strong market positions in particular when quality slitting and/or rewinding are difficult to achieve, and became the global reference in accurate slitting.
- For a perfect slitting quality whatever the type of product and the application, we propose different cutting technologies, adapted to your products and your needs :

Hot cutting

Direct hot cutting

Simple and cost effective solutions for light synthetic fabrics

Pre-set blocks enabling time saving and enhanced slitting accuracy

Ultrasonic cutting

Ultrasonic cutting and sealing in one single pass and performs perfect edges on thermo fusible fabrics

Combined cutting

To improve performances (cutting speed, edges resistance) and obtain clean and sealed edges with excellent finish

BMT : Hot sealing and crush cutting to achieve soft edges on ribbons and labels

Ultrasonic sealing and crush cutting for reinforced and clean edges on sensitive material

Softedger

Combined cutter for flat and smooth edges for ribbons 100% PE, Tafta or satin

Cold cutting

Crush cutting for light natural fabrics, rubberised products & technical textiles

Shear cutting adapted to heavy coated fabrics, nonwovens & rubberised products

Razor blades cutting for plastic and rubberised textiles

Non contractual pictures and datas - Update: Jan. 2016
